Promising Technology

Silicon Valley, CA, April 5th, 2007 – EyeTech Digital Systems, Inc. a leader in eye tracking technology was named a Finalist in CMP Technology's EE Times third Annual Creativity in Electronics (ACE) Awards for Most Promising Technology. The Quick Glance eye tracking system was selected as a Finalist due to its potential to revolutionize.

Check out <http://www.eetimes.com/finalists.htm> for more information on the awards.

Eye Tracking News

Users of eye tracking technology are sometimes concerned with the ability of the eye tracker to function under a variety of lighting conditions, in particular when there is sunlight illumination. EyeTech Digital Systems recently tested a Quick Glance 3 tracking module in a vehicle during daylight hours. The system was set up to track the driver's gaze while operating the vehicle.

The results were encouraging, with no discernible problems caused by sunlight. The vehicle was driven in all four compass directions on a sunny day in Mesa, Arizona.
