

Title: Software/Firmware Developer

Are you an exceptional performer with critical skills we need? Would you like to work in a creative and supportive environment? Do you want to see your work change the world in positive ways? If you think you are a good fit, please contact us at [careers@eyetechDS.com](mailto:careers@eyetechDS.com)

We need these critical skills:

- C++
- Embedded
- Image Processing (including feature and object finding)
- Matlab
- Computational Math
- FPGA
- Windows and Android app development
- Optics
- Technical sales

Our Company

We are a world-leader in eyetracking technology - changing how humans interact with their world. We have traditional markets which give us revenue and profits, but we are rapidly scaling as eyetracking moves into exciting new applications. We have a critical need for additional talent to drive our success forward.

Our Mission

- Create a vision-controlled world
- Naturalize the human-machine interface
- Provide innovative eye tracking technology to OEMs
- Provide a place where people will want to work and can develop as skilled professionals

Our Values

- We do the right thing. (Lawful, ethical, "Golden Rule").
- We accomplish amazing things because we care about the success of the business and the development of ourselves and our coworkers
- We thrive in a fast-paced, entrepreneurial, environment
- We are friendly and supportive with co-workers, customers, and others.

Other requirements - we need people who:

- Enthusiastically support our mission and values
- Are self-disciplined and self-motivated

- Perform exceptionally in their critical skills
- Are flexible across technologies and job duties
- Preferably live in the east valley- Mesa, Tempe, Chandler, Gilbert
- Desire to work in a fast paced, entrepreneurial environment with teammates who are friendly and supportive.
